Objectives

The course objective is to teach students to become competent users of accounting data and to fully integrate their understanding of basic transactions, profits, cost behavior, relevant costs and control systems into their analysis of business problems. Regardless of career objectives, all students will have to deal with some form of accounting information in their day-to-day activities. The task of this course is to ensure a thorough understanding of the nature and behavior of costs so that this type of information can be positively incorporated into the decision making framework. Knowledge of Excel is necessary.

Prerequisites: Business 2257 or equivalent financial accounting course- refer to *Western Academic Calendar* for further details.
